pg. 15: I've mostly had to do away with the honorifics in this arc, since the characters are not actually speaking Japanese, but Fatima has been using *-san* for both Narumi and Mingxiá since she first met them. At first I eliminated it completely, but since Mingxiá comments on it in this chapter, it now has to be approximated with something in English.

These scanlations have been uploaded *only* to Batoto so that I can remove them if the series is ever licensed. Please read them there instead of on websites that rip them and watermark them to make a profit off your views!

Thanks to Judash137 on the mangafox forums for removing the Japanese text, and to the anonymous person who tipped me off to that!

Any group with more experience or skill is welcome to take over at any time or to redo chapters I have already done if they are below the quality that this series deserves.
